INTRODUCTION:-

In technical education sector teachers, technical supporting staff and equipment play an important role. Technical Supporting staff is the backbone of the laboratories. On one side, we always look for resources and talk about resource crunch. On other side, knowingly or unknowingly lot of wastage of resources takes place. Therefore, resources need to be optimally utilized and that applies for human resources as well. Engineering colleges/ Polytechnics are undergoing tremendous changes in the era of globalization and technology explosion. On one hand there is pressure on the institutions to perform better and take steps so that maximum employment of their pass outs is assured. At the same time, there is also a need to enhance effectiveness and efficiency in using institutional resources to make the activities cost effective. There is also pressure on the institutions to become autonomous and self sustained in their activities. Any technical supporting staff carry out variety of roles and responsibilities in laboratory instructions as well in management. Therefore, there is need to sharpen their basic competency in these areas. Keeping this in mind. Directorate of Technical Education, Maharashtra State, Mumbai has organized
